Professional Summary

Full Stack Developer with 3.4 years of experience building scalable web applications and REST APIs using the MERN stack (MongoDB, Express.js, React.js, Node.js), Next.js, TypeScript, NestJS and Python FastAPI. Skilled in Redux state management, real-time features with WebSockets, microservices architecture, and deployment with Docker, AWS EC2, Nginx and CI/CD. Delivers features end to end across frontend, backend, database and production hosting.

Technical Skills

- **Frontend:** React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Redux, Responsive Design
- **Backend:** Node.js, Express.js, NestJS, Python, FastAPI, REST APIs, WebSockets, Microservices, Authentication
- **Databases:** MongoDB, MongoDB Atlas, Mongoose, Redis
- **Cloud & DevOps:** AWS EC2, Docker, CI/CD, Nginx, Vercel, Render
- **Mobile & Media:** React Native, Expo, Cloudinary
- **Practices:** API Integration, State Management, Modular Architecture, Production Deployment, Troubleshooting

Professional Experience

Software Engineer (Full Stack Developer) | CraftySogo

Bengaluru, Karnataka | Jan 2025 – Jun 2026

- Built responsive, interactive UI components with React.js and Tailwind CSS, including AI-powered chat streaming and molecular visualization features.
- Designed and integrated REST APIs with Node.js, Express.js and Python FastAPI to support database-driven application workflows.
- Managed complex application state with Redux, covering chat-streaming data, user sessions and shared UI state.
- Deployed backend microservices on AWS EC2 using Docker, enabling a modular and scalable architecture.

- Implemented dynamic and file-based routing in Next.js, delivering multi-page applications with nested layouts and reusable components.

Software Engineer (Full Stack Developer) | Digibizminds Private Limited

Kalaburagi, Karnataka | Jun 2022 – Dec 2024

- Developed responsive web applications with React.js, building reusable components and maintaining a scalable frontend architecture.
- Designed and built backend services and RESTful APIs with Node.js and Express.js, connecting frontend components to server-side business logic.
- Implemented database operations and data management with MongoDB to support full-stack application workflows.
- Deployed and hosted web applications on AWS EC2, configuring server environments for production.
- Configured Nginx as a web server and reverse proxy to route requests to backend services and serve the frontend application.
- Managed deployments, server configuration and production troubleshooting to maintain reliable application availability.

Projects

SufiSys – Multi-Tenant Finance Management System (SaaS)

React.js, Vite, NestJS, Node.js, MongoDB, Expo, React Native, Cloudinary, Vercel, Render

- Designed and developed a multi-tenant SaaS finance platform for multiple finance offices, with tenant-specific client accounts and role-based access.
- Built modules for customer management, loan lifecycle tracking, daily collections, Pigmy savings accounts, settlements, expenses and business dashboards.
- Implemented role-based workflows for client administrators and collection managers, including a dedicated Expo (React Native) Android app for collection managers.
- Developed NestJS and MongoDB REST APIs supporting tenant-aware data access and finance operations.
- Deployed with Vercel, Render, MongoDB Atlas and Cloudinary.

Education

Bachelor of Engineering in Computer Science and Engineering | Poojya Doddappa Appa College of Engineering | Jul 2017 – Jul 2021 | CGPA: 7.4/10

Languages

English (Full Professional Proficiency), Kannada (Full Professional Proficiency), Hindi (Full Professional Proficiency)
